

HOW NOT TO WASTE MONEY ON CYBERSECURITY

Ahmad Zoua offers his tips and best practices to avoid common security planning mistakes that often waste money. This includes ensuring an organization's security needs are customized to their line of business, culture, people, policies, and goals, and not tailored to the latest security trends.

AHMAD ZOUA PMP

AVP, Cybersecurity & Infrastructure

Ahmad's proven experience as an engineer and project manager allows him to handle a broad range of projects from inception to completion. While overseeing projects from designing and planning to commissioning and testing, Ahmad fosters an environment of teamwork and ensures that strategy is clearly defined and clients' expectations are met. His expertise with data center preparation, design and construction are invaluable for clients as they take the necessary steps to ensure continued operations in the wake of heightened concerns. This includes security and telecommunication systems design, cybersecurity, quality control reviews, and data network migration and integration.
