

HOW NOT TO WASTE MONEY ON CYBERSECURITY

While enterprise security leaders usually do well at estimating threats and vulnerability, they often lack the ability to accurately assess business risk when making the case for sufficient security funding. [Ahmad Zoua](#) weighs in on common mistakes.

AHMAD ZOUA PMP

AVP, Cybersecurity & Infrastructure

Ahmad's proven experience as an engineer and project manager allows him to handle a broad range of projects from inception to completion. While overseeing projects from designing and planning to commissioning and testing, Ahmad fosters an environment of teamwork and ensures that strategy is clearly defined and clients' expectations are met. His expertise with data center preparation, design and construction are invaluable for clients as they take the necessary steps to ensure continued operations in the wake of heightened concerns. This includes security and telecommunication systems design, cybersecurity, quality control reviews, and data network migration and integration.
