

THE SPYING GAME IN DRIVERLESS TECHNOLOGY

The threat of spying in the high stakes, connected car space is a significant concern and should be taken seriously. [Kenneth Mendelson](#) tells *TU-Automotive News* why these underlying technologies are an attractive target and why protecting intellectual property in the automotive industry must be viewed by Boards of Directors and senior management as the enterprise risk that it is.

KENNETH MENDELSON CISSP, CIPP, CISA, PCIP

Senior Managing Director

Ken Mendelson has spent more than 30 years at the intersection of law, information technology and public policy. As a member of the National Security Practice, Ken manages governance, risk and compliance projects and investigations, and conducts monitorships and third-party audits in connection with mitigation agreements enforced by the Committee on Foreign Investment in the United States (CFIUS). In addition, he assists established and emerging companies with implementing and maintaining cybersecurity and privacy programs by developing cybersecurity policies, procedures and guidelines, and conducting risk-based cybersecurity assessments.
