

THE EU'S PROPOSED BAN ON FACIAL RECOGNITION IN THE NEW COVID-19 WORLD – FINDING BALANCE BETWEEN PRIVACY AND PUBLIC SAFETY

COVID-19 elevated the use of #facialrecognition technologies to minimize social contact and reduce the spread of the virus, but it has also raised the concerns of some civil liberties experts. Terry King takes a look at the issue in his latest article.

TERRY KING

Regional Director, EMEA/APAC

Terry K. King is an expert in the design, consultation, and implementation of electronic security solutions. He has more than 25 years of experience in both security consulting services and systems integration. Mr. King specializes in large, new construction commercial projects placing an emphasis on effective communication between critical stakeholders and all associated trades and partners. Further, he has significant experience in the development of design standards for electronic solutions in both commercial and public sectors, ranging a wide degree of vertical markets. In addition to his design and engineering experience, Mr. King has a significant background in the assessment and analysis of existing facilities, including security systems, operational security, and standard operating procedures. His expertise extends to the program/project management of large-scale implementation projects, and the administration of standardized systems.
