

GEN2 RANSOMWARE: WHAT YOU NEED TO KNOW AND LEGAL CONSIDERATIONS IN A NEW ERA

There's been a generational shift in the post-Wannacry ransomware era. Ransomware plagues companies by locking data and demanding ransoms but we now need to accept that data is routinely exfiltrated during these attacks. Industrialization of cyber threat actors has created a strong market for Gen2 ransomware and have changed the business and legal impact of ransomware incidents.

[Join this CLE webinar](#) for a practical discussion on the post-Wannacry ransomware legal landscape, including:

- Recent ransomware Gen2 trends
- Practical, security and legal considerations pre- and post-attack
- Legal considerations for paying the ransom
- Best practices for incident reporting
- Tips for protecting your business and supply chain
