

SMART BUILDING TECH ADOPTION CREATING FERTILE GROUND FOR HACKERS

Bisnow

The use of connected building technology is exploding amid the coronavirus pandemic, forcing property owners and managers to find more ways to provide services to residents without face-to-face interaction. But as adoption of the Internet of Things has grown, awareness of its security risks hasn't kept pace. Kenneth Citarella finds that clients don't always understand the level of risk that they're confronting.

KENNETH CITARELLA JD, MBA, CFE, CIPP/US

Senior Managing Director, Investigations and Cyber Forensics

Ken Citarella guides the international compliance efforts of the firm in its investigative, security consulting, due diligence and compliance consulting practices, including advising clients on how to create and maintain a privacy compliance program. An attorney and Certified Information Privacy Professional by the International Association of Privacy Professionals, Mr. Citarella was one of the earliest prosecutors in the nation involved in the investigation and prosecution of computer-based crime. The High Technology Crime Investigation Association bestowed its Lifetime Achievement Award on Mr. Citarella in 2011.
