

GUIDEPOST IN MOTION EP 5: EDGE DATA CENTERS – A CALL FOR INNOVATIVE SECURITY SOLUTIONS

In this episode, Jon Harris and [Ahmad Zoua](#) talk about the growth of edge [data centers](#) and their specific security needs. With 5G on the horizon, the global market for edge data centers is expected to triple by 2024. The need for edge data centers to be located within major cities presents opportunities for the commercial real estate space and drives the discussion around the unique [security requirements](#).

AHMAD ZOUA PMP

AVP, Cybersecurity & Infrastructure

Ahmad's proven experience as an engineer and project manager allows him to handle a broad range of projects from inception to completion. While overseeing projects from designing and planning to commissioning and testing, Ahmad fosters an environment of teamwork and ensures that strategy is clearly defined and clients' expectations are met. His expertise with data center preparation, design and construction are invaluable for clients as they take the necessary steps to ensure continued operations in the wake of heightened concerns. This includes security and telecommunication systems design, cybersecurity, quality control reviews, and data network migration and integration.
