

CYBERSECURITY AND AUTO DEALERSHIPS – AN OFTEN OVERLOOKED AND UNMITIGATED RISK

When it comes to the day-to-day operations of selling vehicles, an auto dealership's level of cybersecurity protection might not be the first thing that comes to mind. [Chris Arkin](#) provides some practical steps auto dealerships, their counsel, and other advisors can take to mitigate cybersecurity risks.

CHRISTOPHER ARKIN

Managing Director

Christopher A. Arkin has extensive experience working with clients in connection with sensitive and high-stakes regulatory and compliance matters, internal investigations, and criminal and civil litigation. His past representations include the Department of Justice-appointed monitorship of Toyota focused on vehicle safety and the accuracy of the company's public statements; Wal-Mart's Audit Committee in an extensive investigation by the SEC and DOJ for global FCPA compliance and allegations of corruption; a leading financial services institution in various securities-related regulatory matters; and a multinational corporation's anti-bribery and corruption diligence and post-acquisition compliance programs for mergers and acquisitions and other investments.
