AHMAD ZOUA PMP

AVP, CYBERSECURITY & INFRASTRUCTURE

Office: +1 213 624 9000
Email: azoua@guidepostsolutions.com

OVERVIEW

Ahmad Zoua brings to the team vast experience as an engineer and project manager, handling a broad range of projects from inception to completion.

Mr. Zoua has a solid history of delivering strategic solutions, risk management, and client relationship solutions. He is adept at directing teams to deliver design solutions, business development, and maintains excellent communication with clients. He is proficient in creating and streamlining processes to increase effectiveness and is a skilled trainer and project leader, able to direct multiple tasks effectively.

Mr. Zoua has experience working on complex technology projects in multiple verticals, including, but not limited to, aviation, critical facility and healthcare.

His international and domestic project experience is augmented by his advanced communication skills in three languages.

Mr. Zoua has managed many projects in Saudi Arabia, where he delivered medium-to-large IT projects across public and private sectors. Projects delivered include site surveys, data network implementation, data center preparation, and security system design, installation and configuration. In this role, he also directed all testing phases of the quality control process.

Mr. Zoua began his career as a telecommunication site engineer where he directed and performed all aspects of radio frequency engineering, designing and delivering excellent solutions for 3G and LTE tower locations, microwave links and transmission nodes.
