ALEX BALSOY

SECURITY CONSULTANT

Office: +1 469 568 0300
Mobile: +1 214 476 2280
Email: abalsoy@guidepostsolutions.com

OVERVIEW

Alex Z. Balsoy brings more than 5 years of physical security systems experience to the Guidepost team. He is responsible for implementing, programming, and maintaining the integrity of physical security systems.

Mr. Balsoy's programming and implementation expertise includes more than 30 enterprise level security systems for data centers, 40+ access control and video system upgrades, and thousands of security devices for numerous projects. His vast experience covers diagnostics, troubleshooting, and repair of security programming and infrastructure.

Mr. Balsoy has managed pre-deployment testing, documentation, and standardization phases for numerous enterprise technologies, as well as developing and managing effective deployment strategies. He has also managed server and software life cycles.

He utilizes his expertise to deliver end-user training initiatives that streamline operational processes and develop a common baseline of system knowledge across distributed portfolios.

Mr. Balsoy's experience also includes: access control, video surveillance upgrades, migrations and cutovers, technical support, system architecture, audit preparedness, platform assessment, and standards development.
