OVERVIEW

Jack Collins is a security consultant with over 15 years of experience in security systems consulting and design, physical and cyber security vulnerability assessments, testing and vetting emerging technology platforms, and federal government/private industry reviewed security acceptance tests.

Prior to joining Guidepost, he built a new security division utilizing existing and new clients to create a diversified revenue stream and managed national accounts. In his role, he performed a wide range of managerial responsibilities including planning, assigning, and directing work, performance management, and project budgets.

As a project manager, Mr. Collins has experience coordinating all aspects of security projects from award through completion. This management experience includes successfully completing projects with compact schedules, restrictive budgets, and providing accurate reporting. Mr. Collins has also supervised the installation of intrusion detection, access control, video surveillance, and data communication systems.

Mr. Collins served as a team lead and instructor of a counter terrorism training team, performed vulnerability and threat assessments, facilitated instructional and training classes with as many as 60 students per class, and trained Armed Nuclear Security Forces in anti-terrorist tactics.
