## OVERVIEW

Jimil Patel has over sixteen years implementing enterprise solutions. Using his strong conceptual and analytical skills, he has expertise in supporting all phases of the Electronic Discovery Reference Model (EDRM) project lifecycle and has assisted in authoring several expert reports. Mr. Patel has led and managed data analytics projects and effectively interacted with clients and counsel to provide solutions that met all project deadlines.

Mr. Patel is proficient in complex data analytics and has developed numerous software applications to ensure integrity and accuracy of client data. He possesses broad knowledge and capacities in report writing for both structured and unstructured data using a multitude of tools including, but not limited to, Power BI, AWS Quicksights, and Tableau. He is proficient in working with database management systems like SQL Server, Oracle and SQL Lite, and programming languages such as C#, Python and Visual Basic and is Microsoft Certified Solutions Expert in Data Management and Analytics.

Mr. Patel has hands-on experience with data extractions from on premises as well as cloud service providers, backend data manipulations, managing review workflows and creating complex load files. He is also proficient in e-discovery tools like Relativity, Brainspace and IPRO.

Prior to joining Guidepost, Mr. Patel was a managing consultant in Structured Data Analytics, a strategic consulting, technology, and expert services company, where he delivered customized, innovative solutions for complex data challenges, including budgeting and project management. He has also served as a litigation support specialist for the Federal Communications Commission/AAC, was a senior analyst at an AmLaw 100 law firm. He began his career at a global advisory firm providing e-discovery services, software, and consulting.
