

SEAN WELLFORD

SENIOR SECURITY CONSULTANT

Office: +1 312 291 9788

Email: swellford@guidepostsolutions.com

OVERVIEW

Sean R. Wellford has more than 20 years of physical, technical, and operational security and technology infrastructure design and consulting experience. His expertise includes project management, construction management, multi-disciplinary technology systems design, budget analysis, operational policies and procedures, and risk and vulnerability assessments. He develops results-orientated solutions tailored to meet the specific needs of the project.

Mr. Wellford applies a unique mix of fundamental and cutting-edge solutions to solve a variety of physical security needs. His varied experience allows for a unique perspective that centers on the user experience and organizational culture while providing a safe and secure environment.

Mr. Wellford uses his expertise to provide clients with security solutions for crime prevention through environmental design concepts (CPTED) and has extensive experience with video surveillance and alarm monitoring systems as well as physical barriers.

Prior to joining Guidepost Solutions, Mr. Wellford served as a senior technology consultant for WMA Consulting Engineers, Ltd. where he established a dedicated technology practice group and worked with tenants, developers and building managers to provide holistic solutions to complex technology requirements. During his tenure, he transformed the practice into one of the premier technology design and engineering groups in the local market.
