

STEVEN DRAGHI PSP

SENIOR PROJECT MANAGER

Office: +1 212 817 6721

Mobile: +1 908 442 4541

Email: sdraghi@guidepostsolutions.com

OVERVIEW

Steven Draghi has over 29 years of security industry experience in systems design, implementation, project management, and commissioning. His security systems knowledge includes integrated access control, video surveillance, intercom, and perimeter control systems. Mr. Draghi uses his experience as a former security systems integrator to offer a deeper understanding of the installation process and infrastructure requirements. He provides security management, risk assessments, existing systems evaluations, and systems consulting services to his clients.

EXPERIENCE

Penn State Millennium Science Center* – University Park, Pennsylvania

Mr. Draghi provided security systems design services to develop a 270,000 sq. ft. science center with classroom and laboratory space with access control and video surveillance for restricted areas.

Philadelphia Family Court* – Philadelphia, Pennsylvania

Mr. Draghi provided security consulting and engineering design services for a 13-story court facility with 29 courtrooms, a sheriff's area with a central command center, a sally port and 19 holding cells, administration offices,

judge's chambers, and a parking facility. The security systems include access control, alarm monitoring, IP video, intercom, x-ray, and magnetometers.

Nuclear Regulatory Commission* – Washington, District of Columbia

Mr. Draghi provided security systems design for a 6-story office facility and parking structure. Security systems included access control, alarm monitoring, video surveillance, and intrusion alarm.

Smithsonian Institution Support Center* – Washington, District of Columbia

Mr. Draghi provided security systems design of a 40,000 sq. ft. renovation project, that included support and warehouse space. Security systems included access control, alarm monitoring, video surveillance, intercom, and intrusion alarm.

Orange Regional Medical Center* – Walkill, New York

Mr. Draghi provided security design for a 600,000 sq. ft. facility with 374-beds, a Birthing Center, Cardiac Center, and a Level 2 Trauma Center. Security systems included access control, alarm monitoring, vehicle gate, video surveillance, intercom, infant tagging, and a security command center.

Hard Rock Stadium – Miami Dolphins / Miami Florida

Mr. Draghi provided security design for three phases of renovations at Hard Rock Stadium. The renovations included upper and lower concourse levels, club level, all back of house space, suite level, parking lots and gate areas of the stadium. The designed systems included access control, video surveillance, intercom communications, and vehicle gate and crash bollard systems. Included as part of the renovations was the addition of a new security command center which Mr. Draghi helped design.

In addition to the design, Mr. Draghi provided project management during the construction phase as well as commissioning services and project close out services.

SunTrust Park – Atlanta Braves / Atlanta Georgia

Mr. Draghi provided owner's representative services for the ballpark and security design services for four parking garages within the ballpark property. Security systems included in the design included access control, video surveillance, intercom communications, emergency phones and vehicle bollard systems.

Mr. Draghi provided project management services and coordinated the implementation of the integrated systems located within the ballpark, parking garages, and plaza battery areas surrounding the ballpark. Commissioning and project close out services were provided as well.
