

SECURITY CONSULTING

DATA CENTER SECURITY

WE ARE DEDICATED TO THE SAFETY AND SECURITY OF YOUR MISSION CRITICAL OPERATIONAL ENVIRONMENT

Data centers are at the core of the technology ecosystem and the mandate to ensure a safe and secure operational environment is Mission Critical. At Guidepost Solutions, we understand and appreciate today's landscape where events can require the ability to respond at a moment's notice to address customer scalability, optimized operations, connectivity and secured locations. Business continuity, facility security, and the privacy of data is critical so whether it is strategic planning for your newly envisioned locations or analyzing and selecting tomorrow's technologies, we can provide a foundation of proper physical security and network design. With your unique needs in mind, we can customize a business continuity plan and standard operational procedures that will advise and guide how you maintain and operate your environments. Our global technology team and certified project managers are equipped to help you ensure that implementation is seamless around the globe.

SERVICES INCLUDE:

- Strategic planning for newly envisioned locations
- Analyzing and selecting tomorrow's technologies for implementation
- Business continuity assessments and planning
- Facility security assessments and development of foundation for proper physical security and network design
- Privacy of data procedures

We have completed more than 100 projects in the data center sector.
