"Bradley Dizik provides tremendous support to our clients. We have called upon Bradley and his team in a wide range of matters, ranging from cutting-edge intellectual property litigation regarding blockchain products to sprawling DOJ health care investigations to thefts of crypto from individuals. No matter the size and scope of our engagement, Bradley outworks everyone, provides thorough and timely support, and exceptional, client-ready work product. But what sets Bradley apart is his ability to see around corners, to propose courses of action you didn't know your client needed, but once he suggests it, you know they do. It's that extra thoughtfulness, borne of genuine care for our mutual clients, that makes us come back to Bradley again and again. And, wait, he's not even 40?!"
